DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2 and 31 are, drawn to texture data feedback data in a graphics processing pipeline, classified in class 345, subclass 581.
 - II. Claims 32-48 are, drawn to a graphics system producing offset texture data/coordinates multiplied by matrix values classified in class 345, subclass 427.
 - III. Claims 3-30 and 55 are, drawn to the generation and manipulation of texture coordinates, classified in class 345, subclass 345/428.
 - IV. Claims 56-58 are, drawn to a texture mapping unit, classified in class 345, subclass 582.

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(g)). The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the combination as claimed does not require the particulars of the subcombination as

claimed because the combination as claimed does not require the particulars of the subcombinations. The subcombination has separate utility such as texture data feedback data in a graphics processing pipeline; a graphics system producing offset texture data/coordinates multiplied by matrix values; generation and manipulation of texture coordinates and a texture mapping unit.

3. Because these inventions are distinct for the reasons above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to William G. Niessen, Reg. No. 29,683 on November 6, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
